

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

PREFACE

AN index is not a concordance. It is a guide to the matter contained in the work to which it is appended, a finding list by means of which the resources of scholarship afforded by that work may be quickly and fully utilized by the reader. To that end entries which register only passages where information is to be found on the topics suggested by the entries are the desideratum. Those which record the mere occurrence of a word, or of the name of a place or person, without some increment of knowledge in the passage to which reference is made, are usually worse than useless. They involve the consultant of the work in a compensationless expenditure of time, to say nothing of the inconvenience and impatience they cause, and of the increased cost to the purchaser. A "full" index is not infrequently a vexation and a snare, compelling the reader to turn to numbers of passages only to be disappointed by their emptiness in meaning for the particular subject under investigation. Accordingly the aim of the compiler of this index has been to make available, with the least possible expenditure of time to the reader, whatever treasures of knowledge are contained in *THE NEW SCHAFF-HERZOG ENCYCLOPEDIA OF RELIGIOUS KNOWLEDGE*. It is hoped that each reference leads to light on some phase of the subject indicated by the entry.

Index entries printed in *SMALL CAPITALS* reproduce vocabulary titles in the text; those in Roman type do not occur as vocabulary titles in the text. In alphabetizing a series of entries under a comprehensive subject, like that under Augustine, Saint, of Hippo, particles of speech (prepositions and conjunctions) are disregarded, and the entries are arranged alphabetically under the first significant word (noun and adjective)

The Bibliographical Appendix is given in response to numerous requests, and brings the literature down to April 1, 1914.

It is a source of profound sorrow to the associate editor that the lamented editor-in-chief did not live to see the completion of the index to the work to which he contributed the results of his catholic learning, deep enthusiasm, and warm piety. Dr. Jackson's labors on this work were inspired by love and loyalty—love for the diffusion of pure and useful theological learning, and loyalty to Dr. Schaff, the teacher and associate whose name he caused to be retained in the title. Dr. Jackson's entire manhood was devoted, for the most part gratuitously, to the development of theological science, particularly on its historical side. He brought to the direction of this Encyclopedia, his final work, a ripe experience, a broad charity for opinions contrary to his own, and a catholic and tolerant spirit that made collaboration with him ever a delight and never a task.

GEORGE WILLIAM GILMORE,
Associate Editor.
